

Annual Emissions Report

Information Systems Solutions, Inc. Emission Report
2023

Introduction

Thank you for being a valued customer of Plan A's Carbon Manager. We are pleased to provide you with your annual report, representing your annual emissions as calculated on the Plan A platform. For this report, we have consolidated key information concerning your corporate carbon footprint into relevant scopes and categories in line with the GHG Corporate Protocol. Plan A's methodology is audited and certified on an annual basis by TÜV Rheinland.

Our hope is that this report provides you with an overview of your corporate carbon footprint, and allows you to report to your internal or external stakeholders as needed. We're grateful you have decided to work with Plan A, and are looking forward to continuing to serve you in the future. Annual reporting of emissions is only one step in your sustainability journey; whether it is communication, target-setting, or emissions reductions, Plan A is excited to keep working with you to ensure that you can become a sustainability champion in your industry going forward.

Methodology

In order to calculate your emissions, Plan A merges the activity data you enter in our system with the most up-to-date emission factors in the backend to calculate your corporate emissions. This methodology is certified on an annual basis to be in line with the GHG Corporate Protocol. As such, the accuracy of this report is directly tied to the quality of the data you have inputted into our system. Please kindly note that the emissions disclosed in this report may cover only a part of your corporate carbon footprint depending on what modules you are using on the Carbon Manager, and whether you have fully and correctly entered data in the Plan A platform.

Disclaimer

Whilst we take utmost care to merge state-of-the-art science and technology to calculate your corporate carbon footprint, the underlying activity data in this report has not been validated, and Plan A holds no responsibility for inaccuracies due to mistakes with data entry. Should you be interested in a more formal report for regulatory reporting requirements, emission reduction target setting, or customised decarbonisation solutions beyond those in our platform, please do not hesitate to contact our customer success team.

Information Systems Solutions, Inc.

581.85 t CO₂e
TOTAL EMISSIONS

Your emissions for the previous fiscal year have been broken down by scopes and categories per the GHG Corporate Standard. The results are also broken down by quarter to show how your carbon footprint evolved over the course of the previous fiscal year.

Emissions by quarter (expressed in tCO₂e)

153.24 t CO₂e
Q1 (01.01.2023–31.03.2023)

136.16 t CO₂e
Q2 (01.04.2023–30.06.2023)

134.85 t CO₂e
Q3 (01.07.2023–30.09.2023)

157.61 t CO₂e
Q4 (01.10.2023–31.12.2023)

Emissions by scopes and categories (expressed in tCO₂e)

0 t CO₂e
